hello!

Are you currently enrolled in a bachelor's, master's or PhD study program and would you like to take the opportunity to establish an international network and participate in interdisciplinary knowledge transfer?

Are you interested in learning more about the dimensions of sustainability - its concepts, conditions and opportunities to shape a sustainable future?

Would you like to exchange perspectives and develop your language and cultural skills?

If so, then join Forster Summer School!

It is hosted annually by the Faculty of Chemistry, Pharmaceutical Sciences, Geography and Geosciences at the Johannes Gutenberg University Mainz. Each year, scientists from these fields take a closer look at a specific topic from the field of global change and explore various future-based perspectives.

let's talk about global change!

This year Forster Summer School explores – sustainable future. Concepts, conditions, chances.

The 2030 Agenda was adopted by the global community in 2015. The Sustainable Development Goals (SDGs) were set to enable a decent life worldwide and at the same time preserve the natural foundations of life in the long term. Only 6 years left to achieve these goals.

What must, what can each individual do today and in the future to live sustainably? What sustainable options for action can we realize as a community today and in the future on a regional, global and international level?

The goal of Forster Summer School:

The Forster Summer School 2024 is dedicated to utopias of global urban development, green chemistry solutions, geothermal energy resources, sustainable trade, food production and distribution as well as sustainable architecture of living and working spaces.

Join us to discuss concepts, conditions and chances for a sustainable future - on a regional, global and international level !

program overview

DAY	TOPIC
fri, 19 july	ARRIVAL AND GETTING TO KNOW EACH OTHER
sat, 20 july	LANGUAGE AND CULTURAL EXPERIENCE
sun, 21 july	BUILD A TEAM AND EXPLORE THE REGION
mon, 22 july	<u>OPENING – CONCEPTS OF SUSTAINABILITY</u>
tue, 23 july	SUSTAINABLE UTOPIAS AND ENVIRONMENTAL JUSTICE
wed, 24 july	GEOHERMAL ENERGY RESOURCES
thu, 25 july	SUSTAINABLE CHEMISTRY
fri, 26 july	SUSTAINABLE WORK AND LIVING SPACES
sat, 27 july	TRADE, FOOD PRODUCTION AND DISTRIBUTION
sun, 28 july	GROUP PROJECTS AND INDIVIDUAL EXPLORATIONS
mon, 29 july	KEY FINDINGS FOR A SUSTAINABLE FUTURE
tue, 30 july	INDIVIDUAL DEPARTURE

application

Why should you participate in Forster Summer School?

THREE KEY LEARNINGS YOU CAN EXPECT ...

- ... gain an enhanced and holistic perspective on the topic
- ... benefit from interdisciplinary (expert) knowledge
- ... build an international peer network with people from all around the world and take your language and cultural skills to the next level
